PROFILE

I am a highly skilled Python Engineer with a strong proficiency in Python Django frameworks. With over 5 years professional experience in developing and maintaining robust and scalable web and mobile applications, I possess a deep understanding of backend development, along with expertise in database management, API integration, system architecture design and technical writing.

EXPERIENCE

Backend Software Engineer at Expedier Inc (Fintech) *(Oct. 2024 – May 2026)*

- Develop and maintain scalable features for the Expedier Global Money App, facilitating seamless cross-border financial transactions and delivering top-tier user experiences.
- Collaborate with cross-functional teams to design and implement secure and efficient financial solutions aligned with fintech regulations.
- Utilize modern tools and technologies to optimize backend performance, ensuring reliability and scalability for global users.
- Participate in Agile development processes, including code reviews, sprint planning, and feature deployment.

Backend Software Engineer at Entacrest, Lagos *(Jan. 2024 – Aug. 2024)*

- Led a team of 5 engineers to create an internal tool that automated data processing workflows, cutting down manual efforts by 35%.
- Detecting and removing of existing and potential errors (Debugging) from codes that are liable to crash the application unexpectedly, improving the performance of the application by 15%.
- Used Docker and Kubernetes for containerization, resulting in 25% faster deployments and easier scaling.

Backend Software Engineer at AMIS, Lagos *(May 2023 – Dec. 2023)*

- Contributed to backend development in Python (Django) for user authentication, API services, and data modeling.
- Worked with Agile methodology and regularly participated in sprints, standups, and retrospectives.
- Performed unit testing and code reviews to ensure clean, maintainable, and efficient code.

Backend Software Engineer at SoftAmos Global, Lagos *(Jan. 2022 – March 2023)*

- Implemented best practices for code reviews, unit testing, and continuous integration, resulting in improved code quality and faster development cycles.
- Addresses and fixes bugs affecting software performance.
- Gained hands-on experience in using AWS services (EC2, S3) for backend storage and hosting.

EDUCATION

University of Ibadan — BSc. Statistics
Ronik Polytechnic, Lagos, Nigeria — OND. Electrical/Electronic Engineering
Certification: Microsoft Certified - Azure Fundamentals

SKILLS

Programming Languages: Python, JavaScript
Frameworks & Libraries: Django, Node.JS (Express JS), Django Rest Frameworks API
Web Development: HTML, CSS, JavaScript, CMS (WordPress)
Version Control: Git, GitHub, Bitbucket
Cloud Platforms: AWS, Azure, Render
Databases: PostgreSQL, MS SQL, MySQL, NoSQL, MongoDB
Agile Development Methodologies: (Scrum, Crystal, Extreme Programming, FDD)
